#### Version Control with Git

March 2017, Winona State University

- ► Lesson plan taken from Software Carpentry: http://swcarpentry.github.io/git-novice/
- ► This presentation is on GitHub: https://github.com/christopherphan/Winona-SC-git

▶ Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.

<sup>&</sup>lt;sup>1</sup>http://swcarpentry.github.io/git-novice/

- ▶ Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.
- ▶ Want to be able to work on the plans at the same time.

- ▶ Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.
- ▶ Want to be able to work on the plans at the same time.
- ► Two aproaches:

- ▶ Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.
- ▶ Want to be able to work on the plans at the same time.
- ► Two aproaches:
  - Take turns.

- ▶ Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.
- Want to be able to work on the plans at the same time.
- ► Two aproaches:
  - Take turns. Problem: Each one will spend a lot of time waiting for the other to finish.

- Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.
- Want to be able to work on the plans at the same time.
- ► Two aproaches:
  - Take turns. Problem: Each one will spend a lot of time waiting for the other to finish.
  - ▶ Work on their own copies and email changes back and forth.

- Wolfman and Dracula have been hired to investigate if it is possible to send a planetary lander to Mars.
- Want to be able to work on the plans at the same time.
- ► Two aproaches:
  - Take turns. Problem: Each one will spend a lot of time waiting for the other to finish.
  - ▶ Work on their own copies and email changes back and forth. **Problem**: Things will be lost, overwritten, or duplicated.

# Why version control?<sup>2</sup>

- ▶ http://www.phdcomics.com/comics/archive.php?comicid=1531
- ▶ http://bit.ly/motivate\_git

<sup>&</sup>lt;sup>2</sup>http://swcarpentry.github.io/git-novice/01-basics/

### Why version control?

[Y]ou can now freely throw away bits and pieces, secure in the knowledge that if you actually want them back, they are there in the revision control system. Interestingly, almost nobody actually uses this feature. Revision control systems are not there to save your old work. They are there to give you permission to throw that old work away.

—Peter Boothe<sup>3</sup>

<sup>&</sup>lt;sup>3</sup>Quoted at http://tex.stackexchange.com/a/1135/52

#### How it works<sup>4</sup>

<sup>4</sup>http://swcarpentry.github.io/git-novice/01-basics/

#### How it works<sup>5</sup>

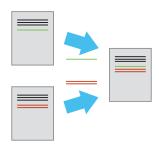

<sup>5</sup>http://swcarpentry.github.io/git-novice/01-basics/

#### How it works<sup>5</sup>

<sup>5</sup>http://swcarpentry.github.io/git-novice/01-basics/

# Format for git shell commands<sup>6</sup>

git *verb* 

#### E.g.:

- ▶ git add
- ▶ git commit
- ▶ git push
- ▶ git config

#### Set-up<sup>7</sup>

#### Don't type the \$s!

```
Configure git (replace the name and email address with your own)
```

- \$ git config --global user.name "Vlad Dracula"
- \$ git config --global user.email "vlad@tran.sylvan.ia"
- \$ git config --global color.ui "auto"
- \$ git config --global core.editor "nano -w"

<sup>7</sup>http://swcarpentry.github.io/git-novice/02-setup/

#### Set-up<sup>7</sup>

#### Don't type the \$s!

```
Configure git (replace the name and email address with your own)

$ git config --global user.name "Vlad Dracula"

$ git config --global user.email "vlad@tran.sylvan.ia"

$ git config --global color.ui "auto"

$ git config --global core.editor "nano -w"

Check all settings:

$ git config --list
```

<sup>&</sup>lt;sup>7</sup>http://swcarpentry.github.io/git-novice/02-setup/

#### Set-up<sup>7</sup>

#### Don't type the \$s!

```
Configure git (replace the name and email address with your own)
$ git config --global user.name "Vlad Dracula"
$ git config --global user.email "vlad@tran.sylvan.ia"
$ git config --global color.ui "auto"
$ git config --global core.editor "nano -w"
Check all settings:
$ git config --list
Can always get help, e.g.:
$ git config -h
$ git config --help
```

Or can consult: *Pro Git*, by Scott Chacon and Ben Straub, available for free at: https://git-scm.com/book/en/v2

<sup>&</sup>lt;sup>7</sup>http://swcarpentry.github.io/git-novice/02-setup/

Don't type the \$s!

Create a directory:

\$ mkdir planets

\$ cd planets

```
Don't type the $s!
Create a directory:
$ mkdir planets
$ cd planets
```

Turn it into a git repository:

\$ git init

```
Don't type the $s!
```

Create a directory:

\$ mkdir planets

\$ cd planets

Turn it into a git repository:

\$ git init

See that a new folder called .git has been created.

\$ ls -a

```
Don't type the $s!
Create a directory:
$ mkdir planets
$ cd planets
Turn it into a git repository:
$ git init
See that a new folder called .git has been created.
$ ls -a
Check the status of our repository:
$ git status
```

<sup>&</sup>lt;sup>8</sup>http://swcarpentry.github.io/git-novice/03-create/

Create a file called mars.txt (e.g. using nano) with the following content:

Cold and dry, but everything is my favorite color

<sup>&</sup>lt;sup>9</sup>http://swcarpentry.github.io/git-novice/04-changes/

Create a file called mars.txt (e.g. using nano) with the following content:

Cold and dry, but everything is my favorite color

Verify the file exists and its contents:

\$ ls

\$ cat mars.txt

Create a file called mars.txt (e.g. using nano) with the following content:

Cold and dry, but everything is my favorite color

Verify the file exists and its contents:

\$ ls

\$ cat mars.txt

Check the status of our repo:

Create a file called mars.txt (e.g. using nano) with the following content:

Cold and dry, but everything is my favorite color

Verify the file exists and its contents:

\$ ls

\$ cat mars.txt

Check the status of our repo:

\$ git status

Add the file to our repo:

\$ git add mars.txt

<sup>&</sup>lt;sup>9</sup>http://swcarpentry.github.io/git-novice/04-changes/

Create a file called mars.txt (e.g. using nano) with the following content:

Cold and dry, but everything is my favorite color

Verify the file exists and its contents:

\$ ls

\$ cat mars.txt

Check the status of our repo:

\$ git status

Add the file to our repo:

\$ git add mars.txt

<sup>&</sup>lt;sup>9</sup>http://swcarpentry.github.io/git-novice/04-changes/

Commit to our repo:

```
$ git commit -m "Start notes on Mars as a base"
```

<sup>&</sup>lt;sup>10</sup>http://swcarpentry.github.io/git-novice/04-changes/

Commit to our repo:

\$ git commit -m "Start notes on Mars as a base"

\$ git status

Verify in the log:

\$ git log

```
Commit to our repo:
```

```
$ git commit -m "Start notes on Mars as a base"
$ git status
```

Verify in the log:

\$ git log

Edit the file mars.txt so that it reads (e.g. using nano): Cold and dry, but everything is my favorite color The two moons may be a problem for Wolfman

<sup>&</sup>lt;sup>10</sup>http://swcarpentry.github.io/git-novice/04-changes/

```
Commit to our repo:
```

```
$ git commit -m "Start notes on Mars as a base"
$ git status
```

Verify in the log:

\$ git log

Edit the file mars.txt so that it reads (e.g. using nano): Cold and dry, but everything is my favorite color The two moons may be a problem for Wolfman

Recheck the status:

<sup>&</sup>lt;sup>10</sup>http://swcarpentry.github.io/git-novice/04-changes/

See difference between the current folder contents and repo:

\$ git diff

<sup>&</sup>lt;sup>11</sup>http://swcarpentry.github.io/git-novice/04-changes/

See difference between the current folder contents and repo:

\$ git diff

Now, commit the new changes to your repo:

\$ git commit -m "Add concerns about effects of Mars' moons on Wolfman"

<sup>&</sup>lt;sup>11</sup>http://swcarpentry.github.io/git-novice/04-changes/

See difference between the current folder contents and repo:

```
$ git diff
```

Now, commit the new changes to your repo:

```
$ git commit -m "Add concerns about effects of Mars' moons on Wolfman"
```

\$ git status

This didn't work, because we have to add first:

```
$ git add mars.txt
```

\$ git commit -m "Add concerns about effects of Mars' moons on Wolfman"

<sup>&</sup>lt;sup>11</sup>http://swcarpentry.github.io/git-novice/04-changes/

### Exercise: Committing Changes to Git<sup>12</sup>

Which command(s) below would save the changes of myfile.txt to my local Git repository?

```
1. $ git commit -m "my recent changes"
```

```
2. $ git init myfile.txt
    $ git commit -m "my recent changes"
```

```
3. $ git add myfile.txt
    $ git commit -m "my recent changes"
```

4. \$ git commit -m myfile.txt "my recent changes"

<sup>12</sup>http://swcarpentry.github.io/git-novice/04-changes/#committing-changes-to-git 📱 🔊 🤉 🤄

#### Exercise: Committing Changes to Git<sup>12</sup>

Which command(s) below would save the changes of myfile.txt to my local Git repository?

- 1. \$ git commit -m "my recent changes"
  - ₩ Would only create a commit if files have already been staged.
- 2. \$ git init myfile.txt
  - \$ git commit -m "my recent changes"
- 3. \$ git add myfile.txt
  - \$ git commit -m "my recent changes"
- 4. \$ git commit -m myfile.txt "my recent changes"

<sup>12</sup>http://swcarpentry.github.io/git-novice/04-changes/#committing-changes-to-git 💈 🔗 🤄

### Exercise: Committing Changes to Git<sup>12</sup>

Which command(s) below would save the changes of myfile.txt to my local Git repository?

- 1. \$ git commit -m "my recent changes"
  - **X** Would only create a commit if files have already been staged. ■
- 2. \$ git init myfile.txt
  - \$ git commit -m "my recent changes"
  - Would try to create a new repository.
- 3. \$ git add myfile.txt
  - \$ git commit -m "my recent changes"
- 4. \$ git commit -m myfile.txt "my recent changes"

<sup>12</sup>http://swcarpentry.github.io/git-novice/04-changes/#committing-changes-to-git 💈 🔗 🤄

## Exercise: Committing Changes to Git<sup>12</sup>

Which command(s) below would save the changes of myfile.txt to my local Git repository?

- 1. \$ git commit -m "my recent changes"
  - **X** Would only create a commit if files have already been staged. ■
- 2. \$ git init myfile.txt
  - \$ git commit -m "my recent changes"
  - Would try to create a new repository.
- 3. \$ git add myfile.txt
  - \$ git commit -m "my recent changes"
  - ✓ Is correct: first add the file to the staging area, then commit.
- 4. \$ git commit -m myfile.txt "my recent changes"

<sup>12</sup>http://swcarpentry.github.io/git-novice/04-changes/#committing-changes-to-git 💈 🔗 🤉 🦠

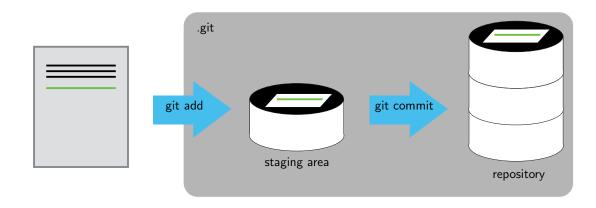

## Exercise: Committing Changes to Git<sup>12</sup>

Which command(s) below would save the changes of myfile.txt to my local Git repository?

- 1. \$ git commit -m "my recent changes"
  - ₩ Would only create a commit if files have already been staged.
- 2. \$ git init myfile.txt
  - \$ git commit -m "my recent changes"
  - **★** Would try to create a new repository.
- 3. \$ git add myfile.txt
  - \$ git commit -m "my recent changes"
  - ✓ Is correct: first add the file to the staging area, then commit.
- 4. \$ git commit -m myfile.txt "my recent changes"
  - ₩ Would try to commit a file "my recent changes" with the message myfile.txt.

<sup>12</sup>http://swcarpentry.github.io/git-novice/04-changes/#committing-changes-to-git 💈 🔗 🤉

# Staging area<sup>13</sup>

<sup>&</sup>lt;sup>13</sup>http://swcarpentry.github.io/git-novice/04-changes/

Edit the file mars.txt so that it reads (e.g. using nano):
Cold and dry, but everything is my favorite color
The two moons may be a problem for Wolfman
But the Mummy will appreciate the lack of humidity

<sup>&</sup>lt;sup>14</sup>http://swcarpentry.github.io/git-novice/04-changes/

Edit the file mars.txt so that it reads (e.g. using nano):

Cold and dry, but everything is my favorite color The two moons may be a problem for Wolfman But the Mummy will appreciate the lack of humidity

See the differences:

\$ git diff

<sup>&</sup>lt;sup>14</sup>http://swcarpentry.github.io/git-novice/04-changes/

Edit the file mars.txt so that it reads (e.g. using nano):

Cold and dry, but everything is my favorite color The two moons may be a problem for Wolfman But the Mummy will appreciate the lack of humidity

See the differences:

\$ git diff

Re-stage the file, then look at differences again:

\$ git add mars.txt

\$ git diff

<sup>&</sup>lt;sup>14</sup>http://swcarpentry.github.io/git-novice/04-changes/

Edit the file mars.txt so that it reads (e.g. using nano):

Cold and dry, but everything is my favorite color The two moons may be a problem for Wolfman But the Mummy will appreciate the lack of humidity

See the differences:

\$ git diff

Re-stage the file, then look at differences again:

\$ git add mars.txt

\$ git diff

To see the differences, we need the --staged flag:

\$ git diff --staged

<sup>&</sup>lt;sup>14</sup>http://swcarpentry.github.io/git-novice/04-changes/

#### Commit to the repo:

- \$ git commit -m "Discuss concerns about Mars' climate for Mummy"
- \$ git status
- \$ git log

#### Commit to the repo:

- \$ git commit -m "Discuss concerns about Mars' climate for Mummy"
- \$ git status
- \$ git log

## Directories in git<sup>15</sup>

Git does not automatically add directories:

- \$ mkdir directory
- \$ git status

## Directories in git<sup>15</sup>

Git does not automatically add directories:

- \$ mkdir directory
- \$ git status

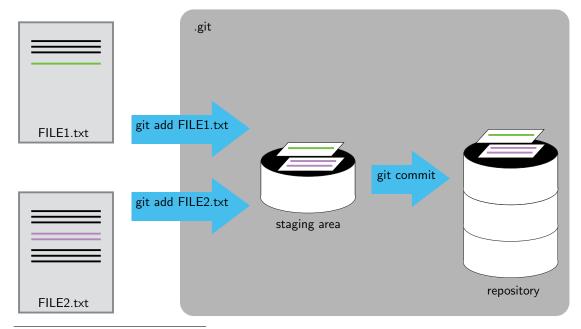

You have to add it explicitly:

- \$ git add directory
- \$ git status

<sup>&</sup>lt;sup>15</sup>http://swcarpentry.github.io/git-novice/04-changes/

# ${\sf Committing^{16}}$

<sup>&</sup>lt;sup>16</sup>http://swcarpentry.github.io/git-novice/04-changes/

## Exercise: Choosing a Commit Message<sup>17</sup>

Which of the following commit messages would be most appropriate for the last commit made to mars.txt?

- 1. "Changes"
- 2. "Added line 'But the Mummy will appreciate the lack of humidity' to mars.txt"
- 3. "Discuss effects of Mars climate on the Mummy"

<sup>17</sup>http://swcarpentry.github.io/git-novice/04-changes/#choosing-a-commit-message

## Exercise: Choosing a Commit Message<sup>17</sup>

Which of the following commit messages would be most appropriate for the last commit made to mars.txt?

- 1. "Changes" 

  ★
- 2. "Added line 'But the Mummy will appreciate the lack of humidity' to mars.txt" 🗶
- 3. "Discuss effects of Mars climate on the Mummy" ✓

<sup>17</sup>http://swcarpentry.github.io/git-novice/04-changes/#choosing-a-commit-message

## Exercise: Choosing a Commit Message<sup>17</sup>

Which of the following commit messages would be most appropriate for the last commit made to mars.txt?

- 1. "Changes" X
- 2. "Added line 'But the Mummy will appreciate the lack of humidity' to mars.txt" 🗶
- 3. "Discuss effects of Mars climate on the Mummy" 🗸

Answer 1 is not descriptive enough, and answer 2 is too descriptive and redundant, but answer 3 is good: short but descriptive.

<sup>17</sup>http://swcarpentry.github.io/git-novice/04-changes/#choosing-a-commit-message 💈
